BRD AT-A -GLANCE

Name of the Organization:	BRD Tanzania
Type of the Organization:	Non-Governmental Organization (NGO)
Country:	Tanzania
Address of the Organization:	P. O. Box 6548, Dar es Salaam, Tanzania
Official Website:	https://brd.or.tz/
Email Address:	info@brd.or.tz,
Date of Establishment:	7th March 2022
Date of Registration:	14th July 2022
Registration Number:	ooNGO/R/3470
Registered under Act:	Non-Governmental Organization Act 2002
TIN Number:	154-274-030
Contact person:	Dr. Joseph S. Mayunga
Contact Person Phone No:	255 768 021824
Contact Person email:	joseph.mayunga@brd.co.tz
Organization focus areas:	DRM/DRR, Climate change, Geospatial and Earth Observation Technologies, Education, Health, and Environment
Founder Members:	Dr. Joseph S. Mayunga Dr. Guido A. Uhinga Ms. Vivaoliva U. Shoo Mr. Hamza A. Farahan Mr. Jonston Weston

1. BACKGROUND

Tanzania faces a wide range of natural and human-induced hazards, including floods, droughts, earthquakes, tropical cyclones, strong winds, landslides, accidents, and epidemics. Weather-related hazards are becoming increasingly significant in the context of climate change, which can intensify exposure and vulnerability and increase their impacts on people, livelihoods, infrastructure, ecosystems, and local economies.

BRD Tanzania was established in response to the need for stronger disaster risk knowledge, preparedness, risk reduction practices, and community resilience. The organization seeks to bridge the gap between scientific evidence, innovative technologies, and practical action by communities, practitioners, and decision-makers.

BRD recognizes that building resilience requires more than emergency response. It requires risk-informed development, stronger institutions and communities, accessible and actionable information, effective preparedness, appropriate technologies, inclusive participation, and continuous learning and knowledge sharing. Through its work, BRD seeks to support individuals, communities, institutions, and decision-makers in reducing disaster risks and strengthening resilience to current and emerging risks.

2. OUR ORGANIZATION

BRD Tanzania is an independent, non-governmental and not-for-profit organization registered in 2022 with registration No. ooNGO/R/3470. It is a Non-Governmental Organization that operates in Tanzania Mainland.

BRD Tanzania is committed to reducing disaster risks and supporting safe, resilient and climate-resilient communities. The organization operates through a multidisciplinary team and three core technical platforms identified in its original profile: the BRD Research Center, BRD Consultancy and Advocacy Center, and BRD Training Center. Humanitarian services, volunteering and outreach complement these functions.

3. OUR OPERATING PRINCIPLE

BRD seeks to work with vulnerable communities, public and private institutions, development partners, professionals and other stakeholders to strengthen capacities to prepare for, respond to and recover from disasters.

4. GOAL, MISSION AND VISION

Our Goal

To reduce disaster risks and build safe and resilient communities for sustainable and climate resilient development.

Our Mission
To contribute to evidence-based, innovative and practical solutions that address disaster impacts and strengthen disaster-resilient communities.

Our Vision
A society in which scientific information, technology and practical risk knowledge are effectively used by practitioners, policy makers and communities to reduce disaster risks and build resilience.

Strategic Approach
To engage with vulnerable communities and relevant institutions to build capacity and strengthen resilience across disaster preparedness, response, recovery and risk reduction.

5. OUR SERVICES
BRD Tanzania provides professional research, training, and consultancy services in the fields of Disaster Risk Management (DRM), Disaster Risk Reduction (DRR), and the application of geospatial and Earth observation technologies to disaster risk management and disaster risk reduction.

Our services are designed to generate knowledge and evidence, strengthen the capacities of institutions and communities, and support the development and implementation of practical solutions for disaster risk reduction, climate resilience, and sustainable development.

BRD's services are organized and delivered through three specialized centers: the BRD Research Center, the BRD Consultancy and Advocacy Center, and the BRD Training Center.

5.1. Research Services
Research services are coordinated and delivered through the BRD Research Center. Our research focuses on a range of thematic areas related to disaster risk management, disaster risk reduction, climate change, and community resilience, including:

- Hazard prevention and mitigation;
- Disaster preparedness;
- Disaster response;
- Disaster rehabilitation and recovery;
- Disaster resilience;
- Disaster risk assessment;
- Vulnerability assessment, including physical, social, political, and economic vulnerability;
- Disaster governance;
- Gender and disaster risk reduction;
- Early warning systems; and

- Climate change mitigation and adaptation.

5.2. Consultancy Services

Consultancy and advocacy services are coordinated through the BRD Consultancy and Advocacy Center. BRD provides professional technical and advisory services to government institutions, development partners, non-governmental organizations, private-sector organizations, communities, and other stakeholders.

Our consultancy services cover a range of thematic areas, including:

- Application of Geographic Information Systems (GIS), remote sensing, and Earth observation technologies in disaster risk management and disaster risk reduction;
- GIS, remote sensing, and geospatial mapping services;
- Development of geospatial tools and solutions for DRM and DRR;
- Development of Disaster Risk Management (DRM) and Disaster Risk Reduction (DRR) strategies;
- Development of climate change adaptation and mitigation strategies;
- Climate change risk and vulnerability assessments;
- Development of Emergency Operations Plans (EOPs);
- Development of Emergency Preparedness and Response Plans (EPRPs);
- Development of Hazard Mitigation Plans (HMPs);
- Development of Disaster Recovery Plans (DRPs);
- Development of Risk Communication Plans (RCPs);
- Development of Crisis Management Plans (CMPs);
- Vulnerability assessments;
- Development of Emergency Operations and Communication Centers (EOCCs);
- Data collection, management, and analysis for disaster risk management;
- Development and review of disaster risk management policies, legislation, and institutional frameworks;
- Humanitarian assistance and support to disaster-affected populations;
- Post-Disaster Needs Assessments (PDNAs) and recovery needs analysis; and
- Refugee operations and environmental management.

5.3. Training Services

Training services are coordinated and delivered through the BRD Training Center. Our training programmes aim to strengthen knowledge, skills, awareness, and practical capacities in DRM and DRR among professionals, institutions, communities, and other stakeholders, particularly those living and working in disaster-prone and vulnerable areas.

BRD offers training programmes in disaster risk management and the application of geospatial science and technologies across a range of thematic areas, including:

- Hazard prevention and mitigation;
- Disaster preparedness, response, and recovery;
- Climate change adaptation and mitigation;
- Geographic Information Systems (GIS), remote sensing, and Earth observation;
- Environmental hazards and risk management;
- GIS and geospatial mapping;
- Development of Disaster Risk Management (DRM) and Disaster Risk Reduction (DRR) strategies;
- Development of climate change adaptation and mitigation strategies;
- Climate change risk and vulnerability assessments;
- Development of Emergency Operations Plans (EOPs);
- Development of Emergency Preparedness and Response Plans (EPRPs);
- Application of GIS, remote sensing, and Earth observation technologies in natural resources management, agriculture, mining, utility management, property management, and environmental management;
- Health and disaster risk management;
- Water, Sanitation and Hygiene (WASH);
- Gender equality and empowerment of women and girls; and
- Community engagement and participatory approaches to disaster risk reduction.

5.4. Humanitarian services and Volunteering

BRD provides humanitarian and emergency support, including emergency relief, health services, and Water, Sanitation and Hygiene (WASH) assistance to disaster-affected populations before, during, and after emergencies, working through national and international partnerships.

BRD volunteers are an important part of our humanitarian response and community engagement. They are drawn from the communities they serve and are guided by relevant national and international humanitarian standards, principles, and good practices to ensure that assistance is provided with integrity, accountability, and respect for affected populations.

Individuals interested in joining the BRD volunteer team are required to register as BRD members through the organization's membership system. Registered members are provided with a certified BRD membership card and may participate in relevant volunteer and community-based activities, subject to BRD procedures and requirements.

5.5. Outreach services

BRD Tanzania is committed to strengthening public awareness, knowledge, and engagement on disaster risk management, disaster risk reduction, climate change, and community resilience.

BRD conducts and supports a range of outreach activities targeting practitioners, policymakers, communities, development partners, and the general public. These activities include workshops, training programmes, seminars, public awareness campaigns, community engagement activities, and knowledge-sharing events.

Through these outreach initiatives, BRD seeks to promote a culture of disaster preparedness, strengthen risk awareness, encourage the use of scientific and geospatial information in decision-making, and support communities and institutions to become more resilient to disasters and climate-related risks.

6. WORK WITH US

Joining BRD means committing to protecting and supporting vulnerable communities while promoting the organization's core values and principles. BRD welcomes applications from qualified individuals without discrimination on the basis of race, colour, sex, national origin, age, religion, disability, or other status protected by applicable laws and policies.

We seek to work with skilled, committed, and compassionate professionals who are dedicated to putting people and communities first, making a meaningful difference in people's lives, and contributing to humanitarian and disaster risk reduction efforts wherever their expertise and support are needed.

Our team members are expected to uphold the principles of professionalism, integrity, accountability, respect, inclusiveness, and service to communities, and to contribute effectively before, during, and after emergencies.

7. DONATE

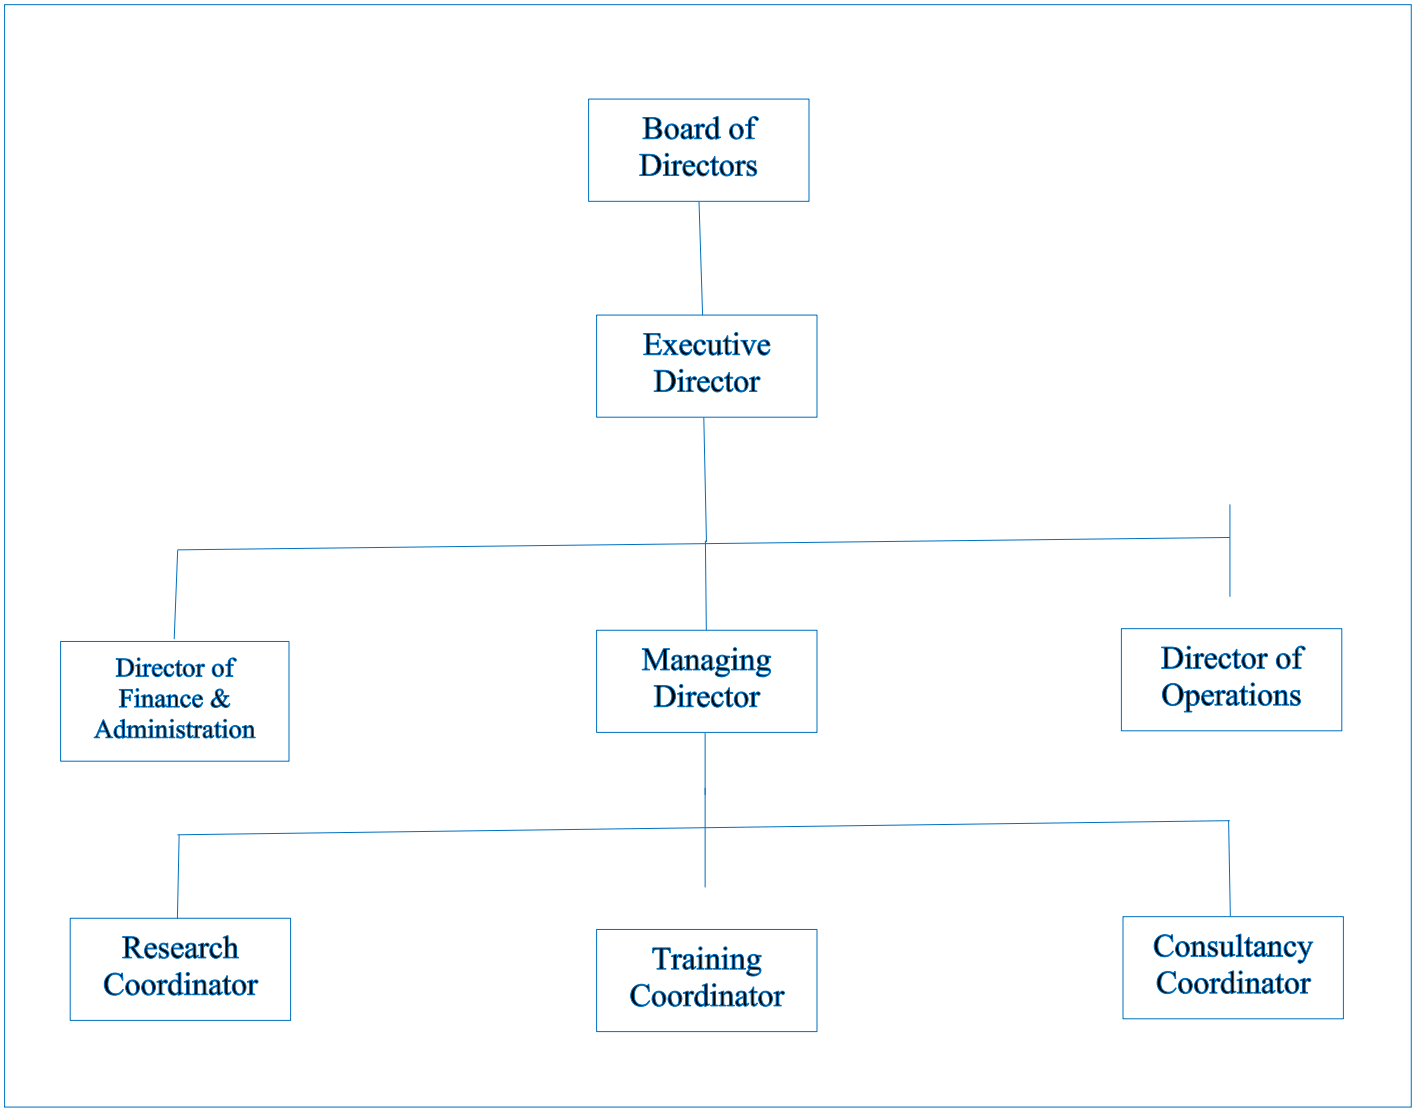

BRD Tanzania welcomes financial and in-kind contributions from individuals, organizations, development partners, and other stakeholders who wish to support our efforts to reduce disaster risks, strengthen community resilience, and protect vulnerable populations.

To make a donation or discuss partnership opportunities, please contact BRD Tanzania at +255 768 021 824 or +255 789 932 878, or visit our website at www.brd.or.tz.

8. OUR ORGANIZATION STRUCTURE

BRD Tanzania is governed by a Board of Directors and supported by an Executive Management Team. The Board provides strategic oversight, guidance, and governance, while the Executive Management Team is responsible for the day-to-day management and implementation of the organization's programmes and activities.

Together, the Board and Management ensure that BRD operates effectively, remains accountable to its stakeholders, achieves its strategic objectives, and advances its mission and organizational goals.

Board of Directors
Executive Director
Director of Finance & Administration
Managing Director
Director of Operations
Research Coordinator
Training Coordinator
Consultancy Coordinator

9. OUR TEAM

BRD Tanzania brings together a multidisciplinary team of experienced professionals and technical experts with a shared commitment to saving lives, reducing disaster risks, and building safer and more resilient communities.
Our team brings together expertise across Disaster Risk Management (DRM), Disaster Risk Reduction (DRR), climate change, geospatial technologies, Earth observation, humanitarian action, community resilience, project management, and related fields**.** Several members of our team have extensive national and international experience in their respective areas of specialization.

This diverse range of expertise enables BRD to provide integrated, evidence-based, and context-specific solutions and to effectively undertake research, consultancy, training, capacity development, and humanitarian assignments related to disaster risk management, disaster risk reduction, climate resilience, and the application of geospatial and Earth observation technologies.
Our core team includes the following experts:

Dr. Joseph S. Mayunga: Executive Director and Co-Founder

Specialization
Disaster Risk Management
Years of Experience
20
Highest Qualification
PhD in Urban and Regional Sciences

Dr. Mayunga is disaster risk management and geospatial and earth observation specialist. He holds a Ph.D. in Urban and Regional Sciences specializing in Environmental hazards from Texas A&M University, in the United States. He also holds a Master's of Science (MSc.) degree in Geo-Information Science and Earth Observation from the International Institute for Geo-Information Sciences and Earth Observation (ITC), the Netherlands.

His research interest is in Disaster Risk Management and the applications of geospatial and earth observation technologies. He has more than 20 years of research experience in the field of Disasters Risk Management and Geospatial science and Technology. Dr. Mayunga has been involved in various research, training and consultancy projects related to Disasters risk management and application of Geospatial science and technology in Tanzania and abroad.

:

Ms. Vivaoliva U. Shoo: Managing Director and Co-Founder

Specialisation
Disaster Risk Management

Years of experience
15

Highest Qualification
MA - Development Policy and Practice of Civil Society

Ms. Shoo is a disaster risk management specialist with over 15 years of experience in the field of DRM/DRR. She holds a Master of Development Policy and Practice of Civil Society from the University of Bradford, United Kingdom. She also holds a Bachelor of Arts in Public Administration from the University of Dar es Salaam.

Her key areas of competences and skills include programming and project management, strategic management programs and operations advocacy, team management, resource mobilization and partnership, budgeting and finance.

Ms. shoo has a wider experience in overseeing and managing multi-donor humanitarian and development technical projects and operations in the area of Humanitarian Emergencies, Refugee Operation (health, nutrition, reproductive child health), Food Security and Sustainable Livelihood, Climate Change and Adaptation, Water, Sanitation and Hygiene (WASH),Protection, Post-disaster (livelihood), Cash Transfer Programming and Operation, Community Engagement and Accountability as well as Protection, Gender and Inclusion.

Dr. Guido A. Uhinga: Director of Operations and Co-Founder

Specialisation
Climate Change

Years of experience 20

Highest Qualification
PhD - Climate Change Studies

Dr. Uhinga is climate change and geospatial and earth observation specialist. He holds a Ph.D. in Climate Change Studies from Ardhi University, Dar es Salaam. Dr. Uhinga also holds a Master of Science (MSc) degree in Geo-Information Science and Earth Observation, specializing in Natural Resources Management from the International Institute for Geo-Information Sciences and Earth Observation (ITC) the Netherlands. Dr. Uhinga has been teaching climate change and GIS and Remote Sensing courses for more than 20 years. Dr. Uhinga has conducted a number of research projects and consultancy projects related to applications of GIS and remote sensing in disaster risk management and Climate change in Tanzania and abroad.

Hamza A. Farahan: Director of Finance and Administration and Co-Founder

Specialisation
Finance and Accounting

Years of experience 20

Highest Qualification
MBA

Mr. Hamza is a Director of Finance and Administration. He holds a Master of Business Administration (MBA) from Eastern and Southern Africa Management Institute (ESAMI). He also holds an Advanced Diploma in Accountancy from the Institute of Finance Management (IFM), Dar es Salaam. Mr. Hamza has more than 20 years of experience in Financial management and budgeting, financial reporting and analysis. He has completed successfully multiple projects related to finance, accounting and budgeting, finance and accounting systems, and resources mobilization.

Mr. Johnston Weston: Project Coordinator and Co-Founder

Specialisation
Disaster Risk Management

Years of experience 10

Highest Qualification
MSc. in Disaster Risk Management

Jonston Weston is a Certified Project Management Professional (PMP) and International Disaster Risk Management professional with more than 10 years of experience in disaster preparedness, disaster risk reduction and community resilience programs, disaster preparedness and response trainings , anticipatory action and forecast based financing, cash and voucher programming, integrated early warning early system, humanitarian Operations (emergency response) among others.

Mr. Jonston holds a Master's of Science degree in Disaster Risk Management (MSc DRM) and Bachelor of Science in Housing and Infrastructure Planning (BSc. HIP) from Ardhi University.

He possesses various DRM/DRR skills including but not limited to Leadership, Enhanced Vulnerability Capacity Assessment (EVCA), practical emergency cash emergency(PECT), resource mobilization, result based project management, monitoring and evaluation and reporting , preparedness for effective response assessment (PER), community engagement and accountability(CEA) and protection gender and inclusion (PGI) coordination, partnerships - especially working with UN Agencies, Red Cross Movement Partners and local communities among others.
